

TU-FixCap Stapler

PNEUMATIC CAP STAPLER

Article nr. 12020

Fasten thin goods without going through the material

When using the TU-FixCap Stapler a plastic cap is inserted in front of the staple, which protects the material and spreads the holding force over a larger area.

FixCap Stapler is built upon our own best-selling PSN-P11/16, a stapler specifically developed for composite staples which won't rust and can be planed and painted.
